COOL TEMPERATE RAINFOREST (Comboyne Plateau: Thone River basin)

As above

NOT CURRENTLY LISTED

Habitat: high elevation cold air drainage (valleys floors and gullies) on the Comboyne Plateau principally associated with the Thone River Basin (but does not include the riparian margin which is Gallery Rainforest).

Localities: Thone River basin, including the urban area of Comboyne Village (but not the footslopes of Comboyne Nature Reserve which is associated with Mount Bulli to the south east).

NOTE: the urban area of Comboyne village which is part of the Thone River basin has frosts (which, when they occur: are often severe), but elsewhere the dominant rainforest of the plateau is Subtropical Rainforest (see the species lists for 5B Subtropical Rainforest (Comboyne Plateau)).
